weather solutions

Position: Meteorologist Spain (m/f/d)

- Location: Remote based in Spain
- Type: Full-time
- Department: Forecasting

This is Weather Solutions

Weather Solutions is privately held weather forecasting company that provides actionable weather insights, helping B2B customers build a safer, more productive and sustainable world. Since the company was founded in 2018, it has enjoyed a very successful growth, enabling to serve customers around the world with the most accurate forecast available in the market.
Our current team consists of experienced meteorologists, data scientists, developers and salespersons working together on big data weather solutions for the mobility, energy, agricultural and media market.

Meteorologist - Winter Roads/Mobility Sector

We are actively seeking a Meteorologist specializing in the winter roads and Mobility sector to join our dynamic team based in Spain. As a valued member of our team, you will be responsible for advising and supporting our Spanish customers on winter road maintenance strategies based on our cutting-edge weather forecasts. You'll work closely with the international Forecasting team and report to the Head of Forecasting in Spain.

What you 'll do:

1. Analyse and prepare tailored weather forecasts for winter road maintenance services in Spain.
2. Draft meteorological and climatological bulletins.
3. Prepare and disseminate weather alerts and warnings.
4. Conduct daily briefings and updates for our customers via telephone or video calls regarding the weather situation.
5. Visit customers in Spain, giving presentations with meteorological insights, and support the commercial team.

About you:

- Excellent communication skills, both orally and in writing.
- You are energetic, analytical and working proactively at a fast pace.
- Willingness to work in shifts, including weekends and bank holidays.

Your Qualifications:

- Master's degree with knowledge in weather forecast creation, e.g., Meteorology, Geography.
- Exceptional interest in the field of Synoptics with a focus on winter road maintenance weather forecasting or willingness to learn.
- Proficiency in Spanish and English, both written and spoken.
- Knowledge of qualitative analysis methods and enjoyment in handling or evaluating qualitative data are advantageous.
- Knowledge of Spanish Geography and Climate.
- Desirable: Proficiency in Excel, programming skills (e.g., Python).
- Any additional knowledge of weather forecasting for the (renewable) energy industry is a plus.

What We Offer:

- Competitive salary and benefits
- Opportunity to participate in the stock option plan
- Focus on personal development and growth through mentoring and training
- Participation in an international multicultural, flat organizational structure with an open and informal atmosphere
